

MatrixOne Team Central™

MatrixOne Team Central offers a secure, structured, virtual workplace that enables ad-hoc collaboration for cross-functional and geographically dispersed teams. Members can collaborate on documents and structured product data, such as parts and request for quotes (RFQs), through discussions, notifications, alerts, and workflow/approval processes.

Virtual teams are essential in order to compete in today's environment of outsourced product design and manufacturing, compressed product lifecycles and custom product configurations. These teams require a robust set of collaborative services to dramatically increase the innovation, speed and effectiveness of core processes, such as product development, program management, strategic sourcing and supplier management.

With MatrixOne Team Central, users can create a collaborative digital workplace of global team members, called a *WorkSpace*. A WorkSpace can be used by geographically distributed team members who offer expertise from various disciplines including design, engineering, manufacturing, procurement and finance. Within the secure WorkSpace, members can create folders; organize, view, review, mark-up and approve documents and other product data; subscribe to event notifications; schedule and access real time meetings.

Business Process Application

Create Online Workspaces for Virtual Team Innovation

Team Central reduces the time and cost spent searching for information that normally resides on user's desktops by enabling teams to work in shared workspaces over the Internet.

With MatrixOne Team Central you can:

- Easily and effectively create secure collaborative *WorkSpaces* for virtual teams
- Collaborate, in context, on documents and structured product data, such as parts and RFQs
- Involve suppliers and partners in the project team early and throughout the product development process
- Assign responsibilities with default and access rights to members and teams
- Manage and share project information more effectively
- Facilitate knowledge capture and information sharing through discussions and automatic event notifications
- Access real-time WorkSpace, task and approval status

MatrixOne PLM Environment

An Online WorkSpace for Virtual Teams

MatrixOne Team Central enables users to create and access WorkSpaces, add and remove team members, create folders and sub-folders and control content access on a granular level.

Features and Capabilities

Assemble Virtual Teams

Add team members, assign roles and responsibilities and provide default access online to quickly and easily assemble cross-functional teams in virtual WorkSpaces.

Manage Documents and Content

Manage and organize shared documents and structured product data—such as parts and RFQs—in customizable folder and sub-folder structures. Users can also revise, check-in/check-out documents and review history and comments.

Manage Workflows and Approvals with Routing

Create routing templates and folders; add files and content to folders and generate routing paths, approval lists and actions using delegation rules, task escalation rules and additional route logic.

Increase Visibility

View tasks, deliverables, documents, drawings and routing lists. Capture the history of activities related to a WorkSpace and search across loosely coupled ENOVIA MatrixOne databases—regardless of location.

Automatic Notifications

Enable users to subscribe to standard notifications, content owners to send *push* notifications and administrators to customize system notifications by company.

Create Discussion Threads

Create threaded discussion items sorted by WorkSpace, folder or content, in order to share ideas and reference documents.

Secure Access

Allow WorkSpace leads to set default access definition for the WorkSpace, including folders and sub-folders. Assign granular access for specific content. Administrators can assign company specific vaults and file stores.

The Matrix PLM Environment

Being the industry's most robust and flexible PLM environment, Matrix PLM provides organizations with a single, secure environment that eliminates the barriers caused by geographically dispersed organizations and value chains, multiple disparate systems and increasing security requirements. The Environment consists of a portfolio of business process applications that work in conjunction with the Matrix PLM Platform and our broad offering of enterprise integrations.

About ENOVIA MatrixOne

MatrixOne, Inc. was acquired by Paris-based Dassault Systèmes in May, 2006 and today is part of its ENOVIA PLM Collaborative Environment family of solutions. The ENOVIA MatrixOne solutions enable companies to accelerate product innovation to achieve top line revenue growth and improve bottom line profitability. ENOVIA MatrixOne is focused on helping companies across the automotive, aerospace & defense, consumer, machinery, medical device, semiconductor and high-tech industries solve their most challenging new product development and introduction problems. More than 850 companies use ENOVIA MatrixOne solutions to drive business value and gain a competitive advantage, including industry leaders such as BAE Systems, Bosch, Comau, General Electric, Honda, Johnson Controls, Linde AG, NCR, New Balance, Nokia, Philips, Porsche, Procter & Gamble, REI, Sony Ericsson, STMicroelectronics and Toshiba. ENOVIA MatrixOne (www.MatrixOne.com) is headquartered in Westford, Massachusetts, with locations throughout North America, Europe and Asia-Pacific.
